Subject: Microsoft Settlement

Dear Sirs:

This note is to add my voice to others who think the proposed settlement on the Microsoft case is a terrible miscarriage of justice.

Microsoft has clearly abused its monopoly to destroy competition. This abuse has forced companies to close, cost jobs and hurt many people.

Microsoft's products, although, often times, inferior are being forced on the public because better products cannot compete with Microsoft's money and monopoly. This settlement does not address the problem and would do nothing to help those harmed or even to punish Microsoft for its criminal behavior.

Sincerely,

Gwen Veneskey
